Kivi Corn

Front-End Web Developer

📍 Tyne and Wear, UK

Front End Software Developer working for an educational institution, and freelance projects.

Delivered Front End development projects to many clients.

Progressing towards Full Stack Web Development.

Proficient in design, development, optimization, testing and deployment.

Distinguished track record of success in CSS preprocessors (Sass), JS frameworks and libraries (Vue.js, React.js and jQuery).

Scored in the top 5% of all HTML and CSS assessment participants.

I am a passionate, motivated team player who always contributes positively, with a helpful attitude and a pleasing disposition.

- Design and layout/wireframing
  - Unique design to impress their prospective clients
- Staging and testing
  - Code the website
  - Add required functionality
  - Ensure device compatibility, speed & ease of use
- Deployment of website

bykivi.com

A portfolio site for clients and employers to read about me and view my work. Vanilla JavaScript. CSS animations.

View project

Landing page 1

A landing page for a leading educational institution. Modern design. CSS3 features. Sass. SEO. Responsive site. A/B testing. Facebook ads.

View project

Kriah.com

One of the best rated reading specialist institution in the country. This site was transformed from a template design to a full stack, mobile responsive 20+ page website, and a login system for users to access resources and FAQ's.

> We've been using Kivi's services for about 2 years, and on multiple projects.
> He's my "go to" guy. I can't say enough about the professionalism, attention to detail, and vast technical knowledge he possesses on multiple levels.
> In addition to all the special skills he's gifted with, Kivi also gives old school customer service like I've never seen elsewhere.
> Kivi has a keen eye for design, is a master of JavaScript & several other programming languages, and has a creative/artistic way about him that allows him to use all of his skill in synergy to bring a project full circle, on time and with a high degree of professionalism. I can't say enough about Kivi Corn.
> But, if you're considering hiring Kivi for yourself, I'd like to ask you to give it a second thought because I'm selfish and would like to keep him as my own personal "secret weapon" as long as possible!!! (of course, I'm just kidding). On a serious note, word is getting out that this guy is good at what he does.
> Hire him before he's all booked up.
>
